SKILLS

Core Backend
Java (8–21) • Spring Boot
Python • TypeScript
Spring MVC / Security / JPA
GraphQL • REST APIs
Microservices • Event-Driven

Cloud & Infrastructure
Azure • AWS (EC2, S3, Lambda)
Apache Kafka • Redis
Docker • Kubernetes
PostgreSQL • MySQL • MongoDB
DynamoDB • CosmosDB

Observability & DevOps
Prometheus • Grafana
Kibana • Raygun • AppDynamics
Jenkins • Azure Pipelines

Frontend
Angular • React
AngularJS • JavaScript

CERTIFICATIONS

Java DSA — Udemy (2024)
Azure Fundamentals AZ-900
Data Science in Python — NPTEL
Certified Data Scientist — Internshala
Programming in Java — NPTEL

INTERESTS

System Design • Scalability
GenAI / LLMs • Cloud-Native
Competitive Programming

ACHIEVEMENTS

570+ LeetCode problems solved
420+ GeekForGeeks problems
5★ HackerRank (Java, Python, C, C++, SQL)
6th Place PepsiCo Hackathon 2024
3rd Runner-up MoveInSync Hackathon 2022

EXPERIENCE

PepsiCo • Gurgaon — Dec 2022 – Present

Software Engineer • Ratings: 2022(4★) → 2023(4★) → 2024(4★) → 2025(5★)

30%	85%	1%	6+
Dev Effort Reduced	Code Coverage	Bug Rate	AI Models Built

- Backend developer on the **CAF layer** leveraging **GraphQL** and **Spring Boot**. Driving **GenAI adoption** and engineering critical internal tools.
- Took ownership of projects previously managed by third-party vendors, playing a pivotal role in implementing **hierarchy changes within PepsiCo PGT**.
- Engineered a **dynamic query builder** resulting in **30% reduction in development effort**. Rewrote codebase using OOP principles, elevating code coverage to **85%**.
- Designed & implemented a **Salesforce integration framework** reducing development time by **30%**. Led Low-Level Design for each User Story with only **1% bug reporting rate**.
- Developed an **app configuration library** as a single point of truth with **Circuit Breaker** and retry mechanisms for enhanced reliability.
- Built tools using **Azure OpenAI** and created a **local Ollama with 6+ AI models**, documented all into a developer library — improving team productivity.
- Crafted an **ALM lifecycle tool** specifically tailored for hackathons and internal innovation programs.

Utilized : Java, Spring Boot, GraphQL, Python, React, Angular, Azure OpenAI, Kafka, Redis, PostgreSQL, Docker

MoveInSync • Bangalore — Apr 2022 – Nov 2022

Software Engineer II • (4★Rating)

99.9%	+40%	800	20+
Uptime	Deploy Speed	Bugs Resolved	Interns Mentored

- Stabilized production services including **meeting room, reporting, analytics & vehicle optimization tools** — achieving **99.9% uptime** and **20% increase in system efficiency**.
- Developed a **Kiosk Meeting Room app** for Android & iOS, making enterprise onboarding seamless and reducing setup time.
- Created **DevOps automation tools** leading to **40% improvement in deployment speed**, 25% reduction in manual intervention, and **15% drop in infrastructure costs** via auto-scaling.
- Implemented **Google Calendar & Outlook Calendar integrations**, contributing to **30% increase in user engagement**. Resolved **800+ Raygun bugs**.
- Led team achieving **90% timely delivery** with only 5% sprint spillage. Guided **20+ interns** — resulting in 95% satisfaction rate & 80% team productivity gain.

Utilized : Java, Spring Boot, Python, Grafana, Raygun, Docker, Android, iOS

MoveInSync • Bangalore — Aug 2020 – Apr 2022

Software Engineer • (Intern → SDE I)

100k/min	10k	-80%	5+
Peak Traffic	Users Served	Sonar Issues	Services Built

- Developed **Reporting Service UI microservice** from scratch — dashboards for day-to-day data & visualization, fetching from Jasper, DataLake, ELS. Managed **50k traffic**.
- Built **Route Management Dashboard microservice** from scratch — unified platform for route planning, generating, merging & splitting. Supported **100k requests/min**.
- Developed **AutoCab allocation service** for **10k users** and contributed to **Sandbox & Google POI Management** services end-to-end.
- Reduced **Sonar issues by 80%** through code simplification. Rewrote multiple microservices using **Java 8 & Spring 2.x** with optimized cab info capture & route generation.

Utilized : Java 8, Spring Boot, Spring MVC, AngularJS, JSP, Kafka, Redis, PostgreSQL
